- Improve Testing Quality
- Reduce Implementation Risk
- Ensure End-to-End Business Process Testing
- Accelerate Testing Project Timelines
- 100% US Based Testing Services
- Ensure Protection of Sensitive Data
- Leverage Skills of a Dedicated Team of Salesforce Testing Experts
- Fully Customizable Testing Packages
- Easily Scalable Testing Services
- Free Internal Staff to Focus on Higher ROI activities

Testing Services

RadixBay provides a comprehensive set of testing services that allows clients to custom tailor a solution that meets their unique needs. Customers can choose from one or more of the following services:

- **Testing Needs Assessments**

RadixBay's analysts evaluate your current testing environment and procedures to create a more efficient model by leveraging our industry best practices, processes and tools

- **Develop Customized Testing Procedures**

- Resource Planning – Estimating project hours and creating timelines (deadlines, milestones)
- Deliverables – Creating test project deliverables that include identifying test cases, expected outcomes and required documentation
- Playbooks - RadixBay designs detailed test scenarios and builds repeatable processes to reduce testing time and improve the quality of test executions
- Defect Management – Once defects are identified, RadixBay uses industry leading defect management tools to create detailed defect reports and performs defect triage to categorize defects, correct and retest

- **Testing Automations**

RadixBay maintains a growing library of automated testing scripts and are able to quickly create new test automations to reduce testing time and improve test quality

- **Test Plan Execution**

RadixBay

- Performance Stress Testing
- Portability Testing
- UAT Testing
- Security Testing

Rural Shore Service Delivery Model:

The RadixBay model utilizes rural delivery centers to provide 100% onshore development, testing and support services. Rural shore combines the cost benefits of offshore services with the security and simplicity of onshore support to deliver cost effective, high-quality solutions.
