

Delivering World Class IT Consulting, Solutions and Managed Services

Innovative | Valued | Consistent | Reliable
Cloud and On Premise Solutions

RadixBay TCOE Integration

RadixBay's dedicated team of Salesforce testing specialists perform a documented, project proven process to quickly and easily assume ownership of your testing projects. The team's goal is to custom tailor a solution that improves testing quality, lowers overall testing costs and reduces application time to market.

DISCOVER

RadixBay's TCOE analysts interview key business and IT stakeholders to understand current capabilities and identify their Salesforce testing objectives.

Key Outputs - Test Strategy, Scope Statement and Project Charter.

PLAN

TCOE analysts meet with business and IT resources to identify and document testing requirements. Test case designers use the detailed specifications to design test plans and use cases.

Key Outputs - Documented Test Plans, Use Cases and Test Environment/Data Requirements.

BUILD

TCOE Analysts build test cases, test execution procedures, and test management and reporting processes. The analysts build automations for all test cases that can be automated.

Key Outputs - Test Execution Plans, Test Cases, Automated Test Scripts.

IMPLEMENT

Perform initial test plan execution and capture and evaluate results.

Key Outputs - Test Summary Report, Testing Traceability Matrix, Defect Management Report.

Rural Shore Service Delivery Model:

RadixBay utilizes their rural-based delivery center to provide 100% onshore development, testing and support services. Rural shore combines the cost benefits of offshore services with the security and simplicity of onshore support to deliver cost effective, high-quality solutions.
