# Compare Rural Shore to Offshore

## **Rural Shore Service Delivery Model:**

The RadixBay model utilizes rural delivery centers to provide 100% onshore Salesforce development and support services. RadixBay provides a comprehensive service solution that covers the entire Salesforce implementation and ongoing support lifecycle.

## **You Can Have it Both Ways**

### **Reduce IT Support Costs + Improve Service Quality**

RadixBay's unique rural shore delivery model combines the cost benefits of offshore services with the security and simplicity of onshore support to deliver budget friendly, high-quality IT solutions.

## **About RadixBay**

RadixBay delivers enterprise grade IT consulting solutions using a new approach that breaks the outdated IT service delivery model. RadixBay utilizes rural development centers to deliver a robust suite of cost effective IT solutions to our clients. This approach delivers high-touch, high-speed results and is aligned with our goal of creating jobs in rural North Carolina.
